

Enbridge Ingleside Energy Center Key Permits

What you need to know

The Enbridge Ingleside Energy Center (EIEC) is host to multiple companies and their projects. There are several permits pending for the different companies operating at EIEC. These permits are in various stages of review, by state regulatory agencies and local municipalities.

To provide some clarity around these permits, we have listed them in the table below, along with their current status, purpose and next steps. These tables identify currently pending permits, not other permits that the respective companies will be seeking at the appropriate times in later stages of development

If you have questions about these permits, the companies' operations or projects, please contact our Community hotline at EIECCommHotline@enbridge.com or **361-461-0995**.

Enbridge Ingleside Oil Terminal, LLC

Permit	Regulatory agency	Status	Purpose	Next steps
Renewal: Title V Operating Permit O3906	TCEQ	Draft permit proposed by TCEQ May 30, 2023	Renew this existing "umbrella" air quality permit that consolidates applicable pre-construction air permits and other regulatory obligations into a single governing document. No new construction or emissions can be authorized under this Title V renewal.	Public notice and comment hearing set for January 11, 2024.
Amendment: New Source Review (NSR) Permit 122362/ Prevention of Significant Deterioration (PSD) Permit PSDTX1430M2/ Greenhouse Gas (GHG) PSD Permit GHGPSDTX209	TCEQ	TCEQ technical review ongoing	Resolve issues identified during voluntary environmental compliance audit, revise bunker oil system to as-built conditions, periodic update of piping component counts, throughput revisions. Includes voluntary review under federal PSD program and addition of GHG permit.	Awaiting TCEQ final technical review and draft permit, after which second public notice period will begin.
Initial issuance: Water Rights Permit 13775	TCEQ	Draft permit proposed by TCEQ February 8, 2023	The Ingleside Oil Terminal already includes firewater pumps and a firewater tank. This permit will authorize additional contingency firewater, avoiding a need to request Emergency Use Authorization from the Texas Governor or use additional potable water beyond that stored onsite. Normal operation is low volume (weekly 30-minute pump test); larger volumes in permit would only be used in a significant emergency situation.	Public meeting set for February 29, 2024.

Ingleside Clean Ammonia Partners, LLC

Permit	Regulatory agency	Status	Purpose	Next steps
Initial Issuance: NSR Permit 174275/ PSD Permit PSDTX1628/ GHG PSD Permit GHGPSDTX234	TCEQ	TCEQ technical review ongoing Initial Public notice period concluded December 14, 2023	Project YaREN: Ingleside Blue Ammonia production plant	TCEQ continues its technical review. ICAP will timely respond to TCEQ requests for additional information and clarification. Once a draft permit is available, a second public notice and comment period will commence.
Initial Issuance: Objectionable Use Permit	City of Ingleside	Under review	Project YaREN: Ingleside Blue Ammonia production plant	Public hearing January 16, 2024

Enbridge Ingleside LPG Terminal, LLC

Permit	Regulatory agency	Status	Purpose	Next steps
Permit: No. 117816	TCEQ	Final (transferred to Enbridge Ingleside LPG Terminal LLC on July 31, 2022)	Authorizes construction and operation of LPG Terminal	None
