

Addendum to Enbridge’s 2013 Corporate Social Responsibility Report (with a focus on 2013 data)

Materials Use Performance Data Sheet

This performance data sheet relates to the following Global Reporting Initiative (GRI G3.1) Environmental Performance Indicators:

- EN1 – Materials use by weight or volume
- EN2 – Percentage of materials used that are recycled input materials

Context

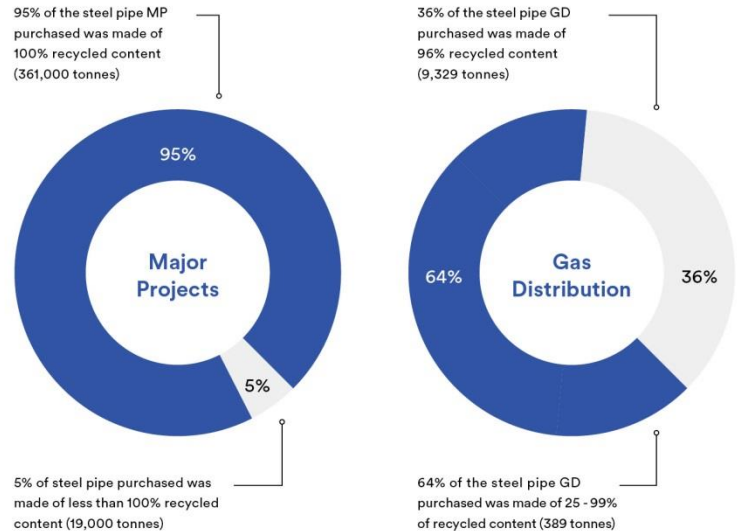

Pipe and paper are the two most commonly used materials at Enbridge.

Management Approach and Background

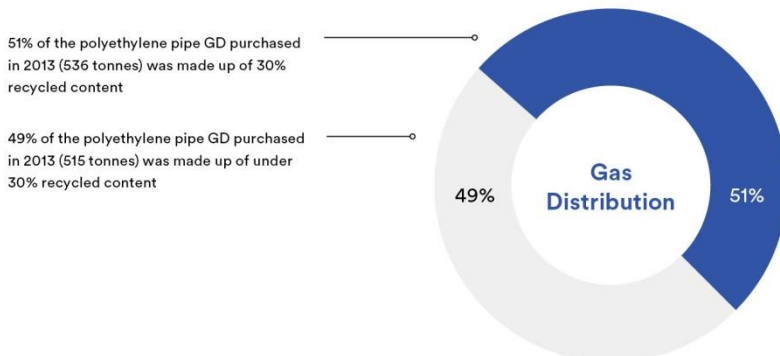

Pipe

The most significant purchase we make is steel pipe, with which we construct our pipelines. Most—94.8 per cent—of the pipe that our primary supplier, Evraz Inc. NA, manufactures for us is made from recycled steel. In 2013, we purchased approximately 380,000 tonnes of pipe from Evraz.

Enbridge Gas Distribution (EGD) purchased approximately 9,718 tonnes of steel pipe and approximately 1,051 tonnes of polyethylene pipe in 2013. The recycled content of 6,250 tonnes of the steel pipe ranges from 25 to 100 per cent, while the recycled content of the remaining 3,468 tonnes of steel pipe is 96.2 per cent. Regarding polyethylene pipe, 51 per cent of total pipe (above 2-inch diameter Nominal Pipe Size) purchased includes up to 30 per cent recycled material.

Recycled Content of Polyethylene Pipe (2013)

Paper

In 2013:

- Our offices in Calgary used approximately 45 tonnes of printing/photocopying paper approximately 69 per cent of the paper purchased having 30 per cent recycled content
- Our Edmonton offices used approximately 94 tonnes of paper
- Our Gas Transportation business unit (GT) used approximately 33 tonnes of paper
- For its administrative activities, our Gas Distribution business unit (GD) used approximately 36 tonnes of paper, with 30 per cent recycled content. In addition, for billing its customers, GD used approximately 5,800 tonnes of paper containing 30 per cent recycled content. To help conserve resources, EGD has initiated a paperless billing option for its 2 million customers. By December 2013, approximately 381,861 customers (approximately 19 per cent) had signed up for this option.
