

Line 3 Replacement Project: Let's get ready to work together

The Line 3 Replacement Program, the largest project in Enbridge history, represents an improvement of our pipeline infrastructure—helping to ensure that Minnesota and the surrounding region are connected to secure, reliable and growing supplies of North American crude oil.

Enbridge is building a qualified skilled labor force and is engaging Tribal and native owned businesses to help this effort. Our priorities are to increase employment, training and suppliers to work on the Line 3 Replacement Project in Minnesota. Are you interested? Are you ready? Look on this jobs and qualifications checklist on the back to get started or call our toll free phone number: **1-855-788-7812 and ask for the Training Coordinator** to learn about these and other opportunities.

Training is available.

Line 3 Replacement Project Work Opportunities
