Enbridge’s economic impact on British Columbia

Enbridge, a North American energy delivery leader, was established in 1949 and exists to fuel people’s quality of life.

We move a very large slice of North America’s oil, natural gas and natural gas liquids, safely and reliably. We operate North America’s premium natural gas transmission franchise, the world’s longest and most complex crude oil and liquids pipeline network, and a blue-chip natural gas utility business.

- These activities deliver a variety of economic benefits to multiple Canadian provinces and territories—and these aspects of our operations also fuel people’s quality of life, whether they’re:
  - well-paying jobs in towns and cities;
  - tax revenue that can help build schools, hospitals and roads;
  - procurement spending that stimulates local economies; or
  - grants and volunteer labor for community-strengthening projects.

As the world’s population grows, we’ll need all forms of energy—crude oil, natural gas, renewables—to meet rising global energy demand. As a company with both pipelines and wind turbines, Enbridge is delivering energy security and driving transformation toward a lower-carbon economy.

And we’re proud to deliver economic benefits in the Canadian provinces and territories, and the U.S. states, where we do business.
Energy assets, operations and projects

Enbridge’s operations, projects, and/or asset ownership interests in British Columbia include:

- The **Alliance Pipeline**, which carries 1.6 billion cubic feet per day (Bcf/d) of natural gas from northeast BC and northwest Alberta a distance of 3,848 kilometres (2,391 miles) to the Chicago area.

- **Aux Sable Canada**’s gas processing facilities (the Septimus Gas Plant and Septimus Pipeline) upstream of the Alliance Pipeline.

- The **BC Pipeline**, which travels from Fort Nelson and Gordondale to the Canada-U.S. border at Huntingdon/Sumas, and moves about 55% of the natural gas produced in B.C.

- The **Spruce Ridge Program**, which involves the addition of two new sections of pipeline and additional compression to existing facilities on the BC Pipeline’s natural gas transmission system in northeastern British Columbia.

- The **T-South Reliability and Expansion Program** and the **Spruce Ridge Program** being undertaken along our BC Pipeline natural gas transmission line.

For more detailed information on Enbridge’s infrastructure, projects and/or community investment activity in British Columbia, please visit our online interactive map at Enbridge.com/map

**Legend**
- bpd – barrels per day
- Bcf/d – billion cubic feet per day
- Bcf – billion cubic feet
- NGL – natural gas liquids
- MW – megawatt
Our workforce
Enbridge’s people live and work in communities like yours as colleagues, neighbors and friends. Much of the salary earned by Enbridge employees is injected directly into the local and provincial/territorial economies.

We have a workforce of about 13,000 people, primarily in Canada and the United States, with major Canadian offices in Calgary, Toronto, Edmonton and Chatham, ON.

**Total base salary paid to permanent and temporary employees**

$21.7M $825M

Tax revenue
Enbridge’s presence in the community fuels quality of life through ongoing tax revenue. We pay property taxes on our pipelines and related facilities—such as terminals, storage facilities, pump stations, compressor stations, and energy generation facilities—as well as corporate income tax and other taxes, including carbon tax, payroll tax, fuel tax, and excise tax.

This revenue can be used for schools, infrastructure (roads and bridges), health and wellness, recreation, transportation and other services that help strengthen the fabric of the community.

**Economic spinoffs***

Enbridge’s ongoing operations, and planned projects, continue to stimulate local and regional economies. Through procurement spending, we’re helping to create indirect employment, support local businesses, and establish economic spinoffs.

Our capital expenditures include such items as pipe steel, equipment purchases and replacement, system integrity-related investments, and capital leases. Meanwhile, our operating and administrative expenditures include such items as maintenance costs, equipment leases, power consumption, and field personnel salaries and wages.

Community investment
Enbridge is committed to supporting and strengthening the communities near our pipelines and facilities, and being a good neighbor is very important to us. Every year across North America, we support thousands of not-for-profit agencies whose initiatives align with one or more of our three focus areas—health and safety, environment, and community.

- Enbridge’s various employee-driven **United Way** campaigns from across Canada and the U.S. help sustain community outreach, poverty reduction, and educational initiatives being coordinated by United Way chapters near Enbridge’s projects and operations. Our United Way campaign totals include employee donations, special events, and corporate matching.

- Enbridge is the title sponsor of the Alberta, Ontario and Quebec legs of the annual **Enbridge Ride to Conquer Cancer**, in which thousands of riders across Canada bring passion and perseverance in their efforts to help achieve a cancer-free future—first by raising thousands of dollars in pledges, then by saddling up for an epic 200-km ride.

- Through the **Our Community Partners** Enbridge employees volunteer time for causes they care about; in recognition of their efforts, we offer in volunteer grants to organizations in Canada and the U.S.

- Our **Helping Hands in Action** program awards grants and matching gifts to charitable organizations, and organizes hundreds of employee-led projects each year focused on improving quality of life in communities in Canada and the U.S.

* All amounts are based on annual forecasting estimates which, while reasonably accurate, may not align precisely with procurement spending totals reported elsewhere by Enbridge and may not reflect actual amounts spent.
Liquids pipelines
Enbridge operates the world’s longest and most complex crude oil and liquids transportation system, with about 27,500 km (17,100 miles) of active pipe across North America. That includes about 13,600 km (8,500 miles) of active pipe in Canada.

- **3M** Barrels of crude and liquids delivered daily, on average
- **62%** of U.S.-bound Canadian crude production
- **34%** of total U.S. crude imports

Natural gas transmission and midstream
Unrivalled in the industry due to their scale, scope and connectivity, Enbridge’s natural gas transmission and midstream pipeline assets cover about 39,400 km (24,500 miles) in 31 American states, five Canadian provinces and offshore in the Gulf of Mexico.

- **18.3B** cubic feet per day (Bcf/d) of natural gas transported
- **158.9B** cubic feet (Bcf) of net working storage through our natural gas transmission
- **625K** bpd of NGLs produced by DCP Midstream, a 50-50 JV between Enbridge and Phillips 66

Natural gas utility
Enbridge Gas Inc. is North America’s largest natural gas utility by throughput and third-largest by customer count, serving about 12 million people through 3.8 million meter connections in Ontario and Quebec.

- **2.3B** cubic feet per day (Bcf/d) of gas distributed to residential, commercial and industrial customers
- **148,800 km** 92,500 miles of gas distribution mainlines and service lines
- **278.7B** cubic feet (Bcf) of net working storage through our natural gas transmission operations

Renewable energy
Since 2002, we’ve committed more than $7.8 billion in capital to renewable energy and power transmission projects currently in operation or under construction. Our green energy portfolio includes 20 wind farms, 4 solar energy operations, 5 waste heat recovery facilities and 1 geothermal project, and we’re expanding our presence in European offshore wind.

- **3,600** MW GROSS of zero-emission energy generated
- **1,750** MW NET
- **700K** homes

Generate enough green energy (based on net figures) to meet electricity needs of*

* projects currently in operation
The big picture: Connecting supply with demand

Enbridge is a global energy infrastructure leader. Our diversified assets are balanced between natural gas and oil, connecting key supply basins and demand markets across North America.
