

Enbridge's economic impact on Alberta

At Enbridge, our goal is to be the first-choice energy delivery company in North America and beyond – and for more than 75 years, we've delivered the energy that fuels quality of life.

We move about 30% of the crude oil produced in North America, we transport nearly 20% of the natural gas consumed in the U.S., and we operate North America's largest natural gas utility by consumer count. We were an early investor in renewable energy, and we have a growing offshore wind portfolio.

- These activities **deliver a variety of economic benefits to multiple provinces and territories** – and

these aspects of our operations also fuel people's quality of life, whether they're:

- **well-paying jobs** in towns and cities;
- **tax revenue** that can help build schools, hospitals and roads;
- **procurement spending** that stimulates local economies; or
- **grants and volunteer labor** for community-strengthening projects.

As the world's population grows, we'll need all forms of energy to meet rising global demand. Enbridge is committed to reaching net-zero GHG emissions by 2050. As a diversified energy company, we are uniquely positioned to help accelerate the global energy evolution, and we're doing it in ways that are ethical,

sustainable and socially responsible.

We also recognize the importance of a secure, reliable and affordable supply of energy, which we deliver every day through our core businesses.

The energy evolution requires a practical approach. That's why we're committed to lowering emissions while meeting growing energy demand; supporting our customers today while anticipating their needs tomorrow; and developing new energy sources while keeping energy costs in check.

We're proud to deliver economic benefits in the Canadian provinces and territories, and the U.S. states, where we do business.

Energy assets, operations and projects

Enbridge's operations, projects, and/or asset ownership interests in Alberta include:

- The 10.5-MW **Alberta Solar One** solar energy project near Burdett, which supplies a portion of our Canadian Mainline crude oil and liquids network's power requirements.
- The 301-MW **Blackspring Ridge** Wind Project in Vulcan County.
- The 30-MW **Chin Chute** and 30-MW **Magrath** wind farms in the Lethbridge area.
- The **Edmonton Terminal**, one of two delivery points for our Regional Oil Sands system, which moves an average of 1.25 million bpd and has a total shell capacity of 10 million barrels.
- The **Express Pipeline**, which delivers oil from Hardisty to Casper, WY, and has associated tankage in Hardisty; the 785-mile line has an average annual capacity of 310,000 bpd.
- The **Hardisty Terminal**, the most important crude oil storage hub in Canada, where Enbridge is the largest

operator of contract storage facilities with about 13 million barrels in shell capacity.

- The **Mainline** system, which delivers more than 3 million barrels of oil every day – consisting of five transportation pipelines between Edmonton and Hardisty (**Lines 1, 2A, 3A, 4 and 67**) and five lines between Hardisty and the Alberta-Saskatchewan border (**Lines 1, 2A, 4, 67 and 93**).
- The **Norman Wells Pipeline (Line 21)**, carrying oil from Norman Wells, NT to Zama; the 870-km (540-mile) line has an annual average capacity of 15,000 bpd.
- The **Open Access Wabamun Carbon Hub**, being developed by Enbridge and the First Nation Capital Investment Partnership (FNCIP) north and west of Edmonton, which will support carbon capture projects including by Heidelberg Materials' Edmonton Capture Project, which itself represents an opportunity to avoid more than 1 million tonnes of atmospheric CO₂ emissions per year.
- The **Regional Oil Sands System**, which provides market access for Canada's

oil sands producers; and includes three long-haul pipelines (**Athabasca, Waupisoo and Woodland**), as well as associated lateral and diluent lines, and our **Cheechem** and **Athabasca Terminals** near Fort McMurray; the Regional Oil Sands System's total annual average capacity is about 2.5 million bpd.

- The **South Cheechem Rail and Truck Terminal**, near Fort McMurray.
- The **Southern Lights** diluent pipeline, which crosses east-central Alberta while travelling 2,560 km (1,591 miles) from Manhattan, IL to Edmonton, delivering an average of 180,000 bpd of diluent.
- The **Mainline Optimization Program (Phases 1 and 2)**, using the Mainline pipeline system's existing infrastructure, to transport an additional 400,000 barrels per day of oil to the best refining markets in North America. The project will enter service in phases between 2027 and 2029.

LEGEND

- bpd – barrels per day
- Bcf/d – billion cubic feet per day
- Bcf – billion cubic feet
- NGL – natural gas liquids
- MW – megawatt

2025 economic benefits at a glance

Our workforce

Enbridge's people live and work in communities like yours as colleagues, neighbors and friends. Much of the salary earned by Enbridge employees is injected directly into the local and provincial/territorial economies.

We have a workforce of more than 16,000 people, primarily in Canada and the United States, with major Canadian offices in Calgary, Toronto, Edmonton and Chatham, ON.

	Alberta	Canada
Permanent and temporary employees, and provisioned contractors, at year's end	3,825	8,591
Total wages paid to permanent and temporary employees	\$465.8M	\$950M

Tax revenue

Enbridge's presence in the community fuels quality of life through ongoing tax revenue. We pay property taxes on our pipelines and related facilities—such as terminals, storage facilities, pump stations, compressor stations, and energy generation facilities—as well as corporate income tax and other taxes, including carbon tax, payroll tax, fuel tax, and excise tax.

This revenue can be used for schools, infrastructure (roads and bridges), health and wellness, recreation, transportation and other services that help strengthen the fabric of the community.

	Alberta	Canada
Property tax	\$69.1M	\$366.8M
Other taxes		\$1.8M
Corporate income tax	\$58.4M	\$539.5M
Total		\$908.3M

Economic spinoffs*

Enbridge's ongoing operations, and planned projects, continue to stimulate local and regional economies. Through procurement spending, we're helping to create indirect employment, support local businesses, and establish economic spinoffs.

Our capital expenditures include such items as pipe steel, equipment purchases and replacement, system integrity-related investments, and capital leases. Meanwhile, our operating and administrative expenditures include such items as maintenance costs, equipment leases, power consumption, and field personnel salaries and wages.

	Alberta	Canada
Capital expenditures	\$444M	\$2.97B
Operating and admin expenditures	\$785M	\$3.44B

* All amounts are based on annual forecasting estimates which, while reasonably accurate, may not align precisely with procurement spending totals reported elsewhere by Enbridge and may not reflect actual amounts spent.

Community investment

Enbridge is committed to supporting and strengthening the communities near our pipelines and facilities, and being a good neighbor is very important to us. Every year across North America, we support thousands of not-for-profit organizations whose initiatives align with one or more of our three focus areas – health and safety, environment, and community – through corporate donations, strategic partnerships and sponsorships.

- Enbridge employees are passionate about making a difference in the communities where we live and work. The **Enbridge Fueling Futures** employee volunteering and giving program amplifies their efforts by offering donation matching, volunteer grants and paid time off to volunteer.
- Enbridge's annual employee-driven **United Way** campaigns across the U.S. and Canada support community outreach, poverty reduction, and educational initiatives led by United Way chapters near Enbridge's projects and operations. Our United Way campaign totals include employee donations, special events, and corporate matching.
- In 2025, through our **Safe Community First Responder Program**, we donated **\$1.4 million** to **109** Canadian emergency responder organizations located near Enbridge's projects and operations; these donations are earmarked for safety equipment, professional training or safety education programming that keeps communities safe.

	Alberta	Canada
Community initiatives	\$4.5M	\$13.7M
		North America
United Way		\$5.9M

A leader in energy delivery

Enbridge is North America's premier energy infrastructure company, transporting about **30%** of the crude oil produced in North America and moving about **20%** of all natural gas consumed in the United States.

Liquids pipelines

Enbridge operates the world's longest and most complex crude oil and liquids transportation system, with about **29,104 km (18,085 miles)** of active pipe across North America. That includes about **13,624 km (8,466 miles)** of active pipe in Canada.

5.8M

Barrels of crude and liquids delivered daily, on average

75%

of American refining capacity connection

99.9999%

safe delivery record over the past decade

Natural gas transmission and midstream

Unrivaled in the industry due to their scale, scope and connectivity, Enbridge's natural gas transmission and midstream pipeline assets cover about **113,092 km or 70,252 miles** (including assets owned/operated by DCP Midstream, a joint venture between Enbridge and Phillips 66, or **31,176 km/19,372 miles** excluding) across 31 American states, 4 Canadian provinces and offshore in the Gulf of Mexico.

24.5B

cubic feet per day (Bcf/d) of natural gas transported

271.1B

cubic feet (Bcf) of net working storage through our natural gas transmission operations

495K

bpd of NGLs (Y-grade to market) produced by DCP Midstream, an Enbridge JV

Natural gas utilities

Enbridge Gas is North America's largest natural gas utility franchise by throughput, serving **7 million customers** in Ohio, Ontario, Utah, North Carolina, Wyoming, Idaho and Quebec. Enbridge Gas has been delivering energy for more than 175 years.

9.3B

cubic feet per day (Bcf/d) of gas delivery capacity for residential, commercial and industrial customers

315,799 km

of gas distribution mainlines and service lines

351.6B

cubic feet (Bcf) of net working storage through our natural gas distribution operations

Renewable energy

Since 2002, we've committed about **\$12 billion** in capital to renewable energy and power transmission projects currently in operation or under construction. Our green energy portfolio includes **23** wind farms, **17** solar energy operations and **1** geothermal project, and we're expanding our presence in European offshore wind.

7,238 ^{MW GROSS}

4,108 ^{MW NET}

of zero-emission energy generated

Generate enough green energy (based on net figures) to meet electricity needs of*

1.9M homes
