Enbridge and EVRAZ: A Saskatchewan success story

Safety and Quality

EVRAZ meets our demands for high-quality pipe, with more rigorous and frequent testing than industry standards.

96% of EVRAZ pipe steel is made of recycled metal – not only a green product, but excellent chemistry for line pipe.

EVRAZ’s $200-million investment enables the production of thicker-walled, 100% made-in-Canada pipe at its Regina facility.

For both Enbridge and EVRAZ, safety and quality are—and will always be—our highest priority.

Economic Benefits

In Regina, EVRAZ employs approximately 1,000 people, creating $600 million in annual regional spending.

Nearly all the line pipe we’ll need for the $5.3 billion Line 3 Replacement Program in Canada will come from EVRAZ.

Since 2006, Enbridge has purchased more than 2.6 million tons of line pipe from EVRAZ.

The vast majority of line pipe for the new Line 3 was manufactured in Regina and at a sister facility in Alberta.

Our inspectors have unlimited access to EVRAZ facilities during the manufacturing process.

Enbridge and EVRAZ have had a close, productive relationship dating back to 2006.

EVRAZ North America, a leader in steel manufacturing, recently completed a $200 million investment in its Regina operations. At Enbridge, the heart of our business is the pipe in the ground. We insist on the best steel, and the best-made pipe.
