

SGS MUSCOWPETUNG

ABORIGINAL CONSTRUCTION MONITORING

WEEKLY REPORT

SPREAD 4

DECEMBER 3RD TO DECEMBER 5TH, 2018

Social and Cultural Features

Field Observation	# of occurrences	Description and Mitigation Measures	Mitigation Status	Further Action Required (Yes/No)
Traditional Use Area (hunting, fishing, gathering, trapping)	3	Native prairie zone		No
Rock Formations (rocks of significance, tipi rings, etc.)	0			
Artifacts	0			
Bones	0			
Potential Gravesites	0			

Environmental Features

Field Observation	# of occurrences	Description and Mitigation Measures	Mitigation Status	Further Action Required (Yes/No)
Medicinal or Cultural Plants	0			
Aquatic Life	0			
Animal Observations or Burrows	0			
Bird Nests	0			
Trees (Red Willow)	0			
Wetlands	0			
Watercourse Crossing	0			

Additional Observations and Summary of Activities or Concerns

Work is finally wrapping up on Spread 4 at the access road. Firstly, the crew was brought in to spray the soil piles down with a beet juice tackifier. The crews got all the piles sprayed down in one day using their hydro seeder. The wind had no effect on the work that day. The next day was used to put back the fence along the lines were the road crew had previously taken it down, and it was completed same day. The camera man arrived and removed all the back-up cams from the equipment before it was loaded up the trailers and hauled away.

Work for Spread 4 has officially wrapped up for the season. It was a very fun and learning experience for myself and the other monitors. We are learning more and more about this line of work everyday. We would like to thank everyone who took time to show us and explain what we were watching and we look forward to any future projects we will be involved in.
