

SGS MUSCOWPETUNG
ABORIGINAL CONSTRUCTION MONITORING
WEEKLY REPORT
SPREAD 4
NOVEMBER 26TH TO DECEMBER 2ND, 2018

Social and Cultural Features

Field Observation	# of occurrences	Description and Mitigation Measures	Mitigation Status	Further Action Required (Yes/No)
Traditional Use Area (hunting, fishing, gathering, trapping)	7	Native prairie zone.		No
Rock Formations (rocks of significance, tipi rings, etc.)	0			
Artifacts	0			
Bones	0			
Potential Gravesites	0			

Environmental Features

Field Observation	# of occurrences	Description and Mitigation Measures	Mitigation Status	Further Action Required (Yes/No)
Medicinal or Cultural Plants	0			
Aquatic Life	0			
Animal Observations or Burrows	0			
Bird Nests	0			
Trees (Red Willow)	0			
Wetlands	0			
Watercourse Crossing	0			

Additional Observations and Summary of Activities or Concerns

The past week was spent exclusively at the Bethune pipe yard on spread 4 working on the access road to valve 14. When work was first started, it was assumed that the entire road would be finished completely by December. But it was decided that they could not get the right compaction down with the weather being so cold. So, it was decided to just strip the top soil to the end of the fence line and clean up the soil piles neatly until next year when it is warm out. A grader was used to make the existing road as level and smooth as it could be for work to commence next year. The crew worked everyday and were able to finish last Friday.

We will be back next week, for only one or two days to complete grading the access road for next year.

Photos of Sites Visited & Topics Discussed This Week

STRIPPING TOP SOIL FROM ACCESS ROAD.

LEVELLING ACCESS ROAD WITH GRADER.
