Spring/Summer 2023

Through the Line

Information for communities along our pipeline right-of-way in Wisconsin

Spring/Summer 2023

Dear neighbor

Message from Jerrid Anderson

Well, it's arrived...summer weather and all that the season brings with it. Wisconsin is buzzing with recreational activities that bring family and friends together. Outdoor grilling, hiking, boating and all of the things that bring life to our summer are unfolding.

It's also a season for outdoor repair work. As many of us tend to our home and yard projects, our pipeline crews are also tending to maintenance work that involves crews out along the right-of-way doing surveys, brushing overgrowth, and addressing planned pipeline maintenance. If you have questions, email enbridgeinwi@enbridge.com or call 1-833-362-7434.

If you are receiving this newsletter, it's likely you have a pipeline or other underground utility on your property. Please call 811 before you dig to schedule no-charge underground utility location and prevent damage or worse.

Some of our readers may be interested in project activity we have proposed and have also wrapped up. The good news is that we've powered up our solar self-power facilities aligned with our Adams and Portage pump station facilities in southern Wisconsin. Over 61,000 solar panels went online in June. These facilities support our goal of net-zero carbon emissions by 2050.

Our work to progress the proposed Line 5 Wisconsin Segment Relocation Project 41-miles around the Bad River Reservation in northern Wisconsin continues to work its way through the state and federal permitting processes. It takes time, and we support a thorough review. We have committed to at least 10% of the construction workforce on this project to be Native American. To further some of our goals for Native American hire, we are supporting Five Skies Training and Consulting to hold a 4-week training program that sets up Native American citizens to be successful in careers in the construction trades like many associated with the Line 5 Wisconsin Segment Relocation Project. Please visit our project webpage at enbridge.com/L5Wis for periodic updates.

I wish you all a safe and enjoyable summer.

Jerrid Anderson
Midwest Region Director
Safety. Integrity. Respect. Inclusion.

Safety report

Safety of our neighbors, employees, communities and the environment is our number one priority because if we don't get safety right nothing else matters. From 2013 through 2022 inclusive, we invested more than \$11.79 billion in programs that help us maintain or improve the safe operation of our systems across our operations in the U.S. and Canada.

We invest significantly in our systems and leak detection by monitoring our systems 24/7, 365 days per year; continually inspecting pipelines and facilities to ensure optimal safety and reliability performance; right-of-way surveillance by air to watch for potential issues; and monitoring our pipelines through multiple computerized systems, each with a different focus and each using different technology, resources and timing to provide overlapping and layered leak detection.

2022 safety at a glance:

38,242
pipeline integrity inspections

210
emergency exercises and drills

4.336 billion
barrels of oil delivered

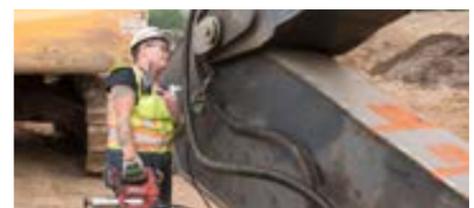

99.9999963%
safe delivery record

Public safety agencies held training exercise

Nearly 30 firefighters from Lac Courte Oreilles, City of Hayward, Town of Hayward, Stone Lake and Couderay trained together with Sawyer County representatives, public health officials and Enbridge operations personnel at a tabletop emergency response exercise hosted by the Lac Courte Oreilles Fire Department. Participants talked through how they would respond together with other agencies, maximizing resources to protect the community and each other.

This table-top exercise and others like it offer an opportunity to bring emergency responding agencies together to test our response plans, to build relationships, and collaborate. Safety is our number one priority, and this is one example of how we practice that commitment.

Empowerment training opens pathway into the trades

An empowerment class began June 5 with 21 participants. Since 2019, a partnership between Five Skies Training and Consulting and Enbridge has broadened as unions, contractors and other groups look to connect Native American job seekers to meaningful careers. "They're gonna open the door for you," says Joel, a program graduate. "Before the Five Skies program I wasn't aware there were so many opportunities," explains Ashley. "My whole life changed," says Melissa.

Learn more about future training opportunities at fiveskies.org.

In the community

Bay City Bohemian Hall in Ashland is open for business

Renewed energy is coming from the Bay City Bohemian Hall in Ashland. Local community members Nancy and Dixie of the non-profit's board have engaged nearly Herculean effort to renovate the more than century old community center for the benefit of community members looking for affordable venues for weddings, meetings, and even music festivals. With the support of \$40,000 from an Enbridge grant, significant foundational work was done.

"I'm pretty passionate about wanting this to come back to life. And, it is," said Nancy. "Enbridge was by far our biggest grant, which helped us do a lot of projects. Enbridge appears to be very community minded. Everybody was so helpful."

Economic synergy with Centergy at Central Wisconsin Days

This year was a success. According to Angel Whitehead, President/CEO of Centergy, Inc., "Central Wisconsin Days, an advocacy event of Centergy had record-breaking participation down at the Capital. This event is an opportunity for the business community to have their voice heard in Madison. Centergy listened to the region and advocated for childcare, housing and tax reform. Each of these areas impacts on the recruitment and retention of the workforce."

The event kicked off with a Leadership Reception hosted by Enbridge. The connections and comradery that happened at this event sets the tone for the next day of advocacy. The full-day event was successful with sixteen teams visiting over forty-five legislators.

Angel adds, "Enbridge has been a long-time partner with Centergy, focusing on growth in our local communities. Additionally, Enbridge serves on the Board of Directors that oversees Centergy's strategy. Without the continued support and leadership from Enbridge, impactful, engaging events such as these cannot happen."

Nature, education and sports are all in "SCOPE"

In central Wisconsin, community non-profit enhances youth connection with the outdoors. The mission of Sawyer County Outdoor Projects and Education (SCOPE) can be summed up into a simple goal for youth in Wisconsin: Do more stuff outside.

Established in 2008, SCOPE has provided a platform for over 15 years in Hayward, WI for youth to not only participate in more outdoor sports and activities, but also to learn about their natural surroundings and learn sustainable practices in becoming environmental stewards.

More than 1,000 kids are supported by SCOPE each year in a variety of ways. The organization covers program registration fees, provides equipment and tools when necessary, and puts together teams for participation in tournaments and competition.

This summer, the lodge will be getting a major upgrade. SCOPE plans to build an Environmental Outdoor Education Center and increase accessibility to water access points, such as the nearby Hay Creek watershed. Here, students will learn about habitat remediation and conservation.

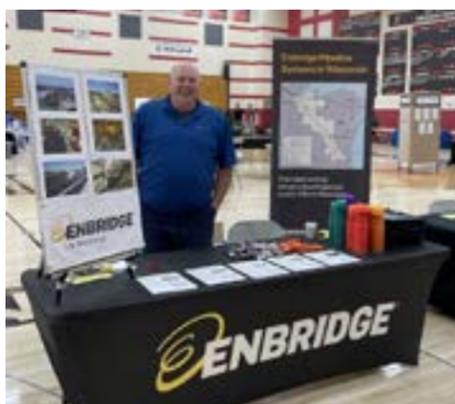

Enbridge is committed to creating sustainable communities near our operations, and supports projects that help improve, grow and nurture our environment. A recent Enbridge \$20,000 Fueling Futures grant will help SCOPE build an outdoor classroom pavilion and improve accessibility to the nearby lake and springs.

> Roly Poly Days 2023 was a blast! This Mellen, Wisconsin community event brings people together to celebrate community and heritage. This year Enbridge donated a gas grill as the grand prize. Cathy Kern was the lucky winner of the grill and \$100 of meat donated by Northland Foods. Pictured here with Michelle Johnson of Enbridge is Cathy and Gina Broeniman from Northland Foods.

> Kyle Bridell and Greg LeJeune from Enbridge greeted students at the Enbridge booth with pipeline system model and goodies for a career fair at the Superior Middle School.

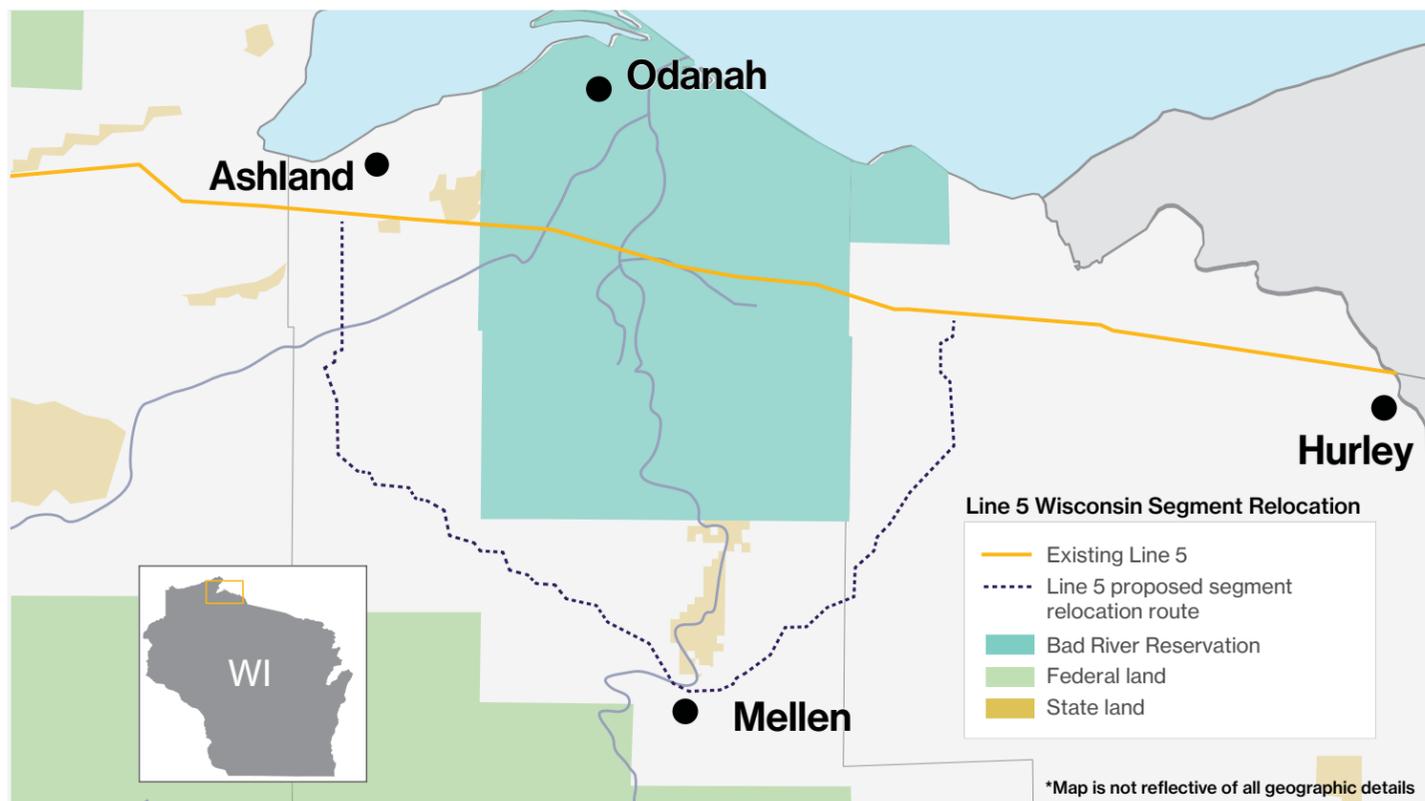

> John Schwarz (pictured) and Jon Eisele enjoyed their day at the Fort Atkinson High School talking with area students about Enbridge.

> Several students expressed interest in Enbridge and job opportunities at the Madison Tech College Career Fair.

Line 5 Wisconsin Segment Relocation Project Ecofootprint Grant Program

Enbridge is pleased to announce the creation of the new, 2-year, \$500,000 Ecofootprint Grant Program to provide funding to help protect and restore the natural environment. Communities in Wisconsin near and along the Line 5 Segment Relocation Project in Ashland, Bayfield, and Iron counties along with the Bad River and the Red Cliff Band of Lake Superior Chippewa may be eligible to receive grants in varying amounts.

Eligible organizations include non-profit 501(c)3 organizations, Native American Tribes, state government agencies, local governments, and postsecondary academic institutions.

The proposed Line 5 Wisconsin Segment Relocation Project is progressing through the permitting process. The map above shows the proposed project route.

Enbridge is partnering with Lumberjack Resource Conservation & Development Council, Inc. to administer the Ecofootprint Grant Program. To learn more, visit enbridge.com/ecofootprintgrant, email Ecogrant@enbridge.com, go to the Lumberjack website at lumberjackRCD.org, or call them directly at (715) 369-9886.
