Agenda

L5 Wisconsin Segment Replacement Project

- Welcome
- Safety Moment
- Project Updates
- Tribal Economic Engagement Discussion
- Audience Q&A
- Guest Speaker: Jackson Kysar, WJE
- Audience Q&A
- Wrap Up

Carbon Monoxide Safety

Carbon monoxide is an odorless, colorless gas that can kill you.

Where is CO found?

Fumes from cars or trucks, small engines, stoves, lanterns, grills, fireplaces, gas ranges, or furnaces. CO can build up indoors and poison people and animals.

What are the symptoms of CO poisoning?

Flu-like symptoms: Headache, dizziness, weakness, upset stomach, vomiting, chest pain, and confusion.

Who is at risk from CO poisoning?

Everyone! Each year: 400 Americans die, 20,000 visit the emergency room, and 4,000 are hospitalized.

Carbon monoxide detector

What can you do?

Service your heating system, water heater and any other gas, oil, or coal burning appliances every year.

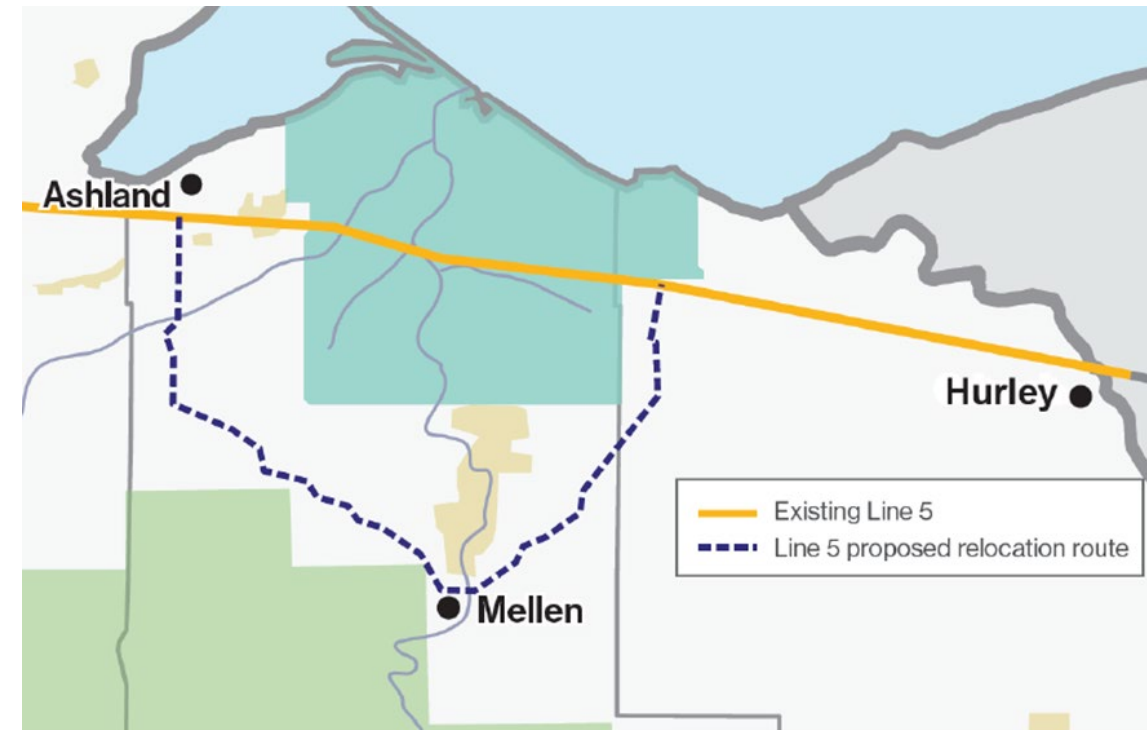

Install a battery-operated CO detector in your home (on all levels). Check/replace the battery when you change your clocks each spring and fall.

Don't use a generator, charcoal grill, camp stove, or other gasoline or charcoal-burning device inside your home, basement, or garage.

Project Details

Line 5 is a vital link to propane and other energy supplies

- Safely operating since 1953
- Permits filed with WDNR in early 2020
 - Public meeting and comment period, June – July 2020
 - Awaiting draft Environmental Impact Statement
- Community Meetings in February
- Virtual Meetings: May, October + December 2020
- Public Service Commission of Wisconsin
 - Secured agreements with 100% of landowners along route; withdrew application, July 2020
- Construction upon receipt of permits
 - Approximately 700 union jobs
 - Anticipate in service date -- 2021, pending regulatory approval
