E-mail: Enbridge-Tariffs@enbridge.com

The rates listed in this tariff are payable in United States currency and are applicable on the international movement of Crude Petroleum tendered to Enbridge Pipelines Inc. at established receiving points in Canada for the purpose of transportation on the Enbridge Energy, Limited Partnership system and the Spearhead Pipeline System in the United States.

RATES:

Rates set forth apply to transportation from the receipt point to the delivery point for a given volume tier. The Joint Committed Rates for Committed Volumes payable by a shipper at any time shall be based on the shipper's then current Committed Volume.

Commodities shall be classified on the basis of the density and viscosity of such commodities at the time of receipt by Enbridge Pipelines Inc. and assessed a transportation rate as listed in the transportation rate tables below. Density shall be based on 15°C. Viscosity shall be based on Enbridge Pipelines Inc.'s reference line temperature at the time of receipt. Where the density of a commodity falls within the density range of one commodity classification and the viscosity of the commodity falls within the viscosity range of another commodity classification, then the commodity shall be deemed to be in the commodity classification with the higher transportation rate.

LIGHT CRUDE PETROLEUM (LIGHT) – A commodity having a density from 800 kg/m³ up to but not including 876 kg/m³ and a viscosity from 2 mm²/s up to but not including 20 mm²/s will be classified as Light Crude Petroleum.

MEDIUM CRUDE PETROLEUM (MEDIUM) – A commodity having a density from 876 kg/m³ up to but not including 904 kg/m³ and a viscosity from 20 mm²/s up to but not including 100 mm²/s will be classified as Medium Crude Petroleum.

HEAVY CRUDE PETROLEUM (HEAVY) – A commodity having a density from 904 kg/m³ to 940 kg/m³ inclusive and a viscosity from 100 up to and including 350 mm²/s will be classified as Heavy Crude Petroleum.

TANKAGE: For the applicable Tankage charges for the Committed International Joint Rates on Enbridge Pipelines Inc. system in Canada and the Enbridge Energy, Limited Partnership system in the United States, refer to Enbridge Pipelines Inc.'s interim CER Tariff No. 595, Enbridge Pipelines Inc.'s CER RT Tariff No. 25-2, and Enbridge Energy, Limited Partnership's FERC Tariff No. 43.54.0, and successive issues thereof. Committed Shippers electing to use tankage facilities at CCPS Transportation, LLC's Cushing Terminal will pay a per barrel charge for such use of such facilities as referenced in CCPS Transportation, LLC's local proportional tariff, FERC Tariff No. 38.26.0 or successive issues thereof.

TERMINALLING: Receipt and delivery terminalling services are included in the rates.

LOSS ALLOWANCE: Enbridge Pipelines Inc. shall deduct 1/20th of 1% of the volumes of Crude Petroleum received into its facilities to cover loss due to shrinkage and evaporation incident to transportation on the Carrier's facilities. Enbridge Energy, Limited Partnership and CCPS Transportation, LLC will deduct loss allowance according to their respective Rules and Regulations.

NOTES:

Abandonment Surcharge: Pursuant to the NEB's MH-001-2013 Reasons for Decision, Order MO-030-2014 and the CER decisions and directions under the Five-Year Review of Abandonment Cost Estimates and Set-Aside/Collection Mechanisms 2021, the transportation rates are subject to an abandonment surcharge which is adjusted for distance on the Enbridge Pipelines Inc. system. The abandonment surcharge is subject to periodic review and adjustment by the Canada Energy Regulator.

Minnesota Abandonment Surcharge: Pursuant to the Minnesota Public Utilities Commission Order issued in Docket No. PL-9/CN-21-823, the transportation rates are subject to a surcharge which is adjusted for distance on the Enbridge Energy, Limited Partnership pipeline system. The Minnesota abandonment surcharge is subject to periodic review and adjustment by the Minnesota Public Utilities Commission.

JOINT ROUTING:

Receipt points in the provinces of Alberta, Saskatchewan and Manitoba to a delivery point in the state of Oklahoma.

Enbridge Pipelines Inc. – Edmonton or Hardisty, Alberta; Regina, Saskatchewan; Cromer, Manitoba to the International Border near Gretna, Manitoba, connecting to;
